

AFE Management System
 PERC Morning Report Software
 PASS Project Acceleration Software
 RS Resource Scheduler Software

Ease of Use

Daily information can be entered into one report screen, customized to meet your requirements. By not having to access several screens, this saves hours of time per week.

Presentation

Over 80 pre-formatted reports including Daily Operations Summaries, Partners Reports, AFE vs. Actual Costs to Date and Time Breakdowns are available at the click of a button. A robust series of x/y plots and bar graphs are also available.

Analytical Tools

Our Ad-Hoc Querying Tool will allow even novice users to ask any questions and export the result as a report, plot or spreadsheet. Several engineering programs are also included that work directly off the entered morning report such as Hydraulics, Directional and Well Control calculations.

Communications

Data is transmitted in both a compressed and encrypted format for security. Data, graphical pictures and mail documents can be transmitted from the wellsite to the office for complete well history storage.

Data Management

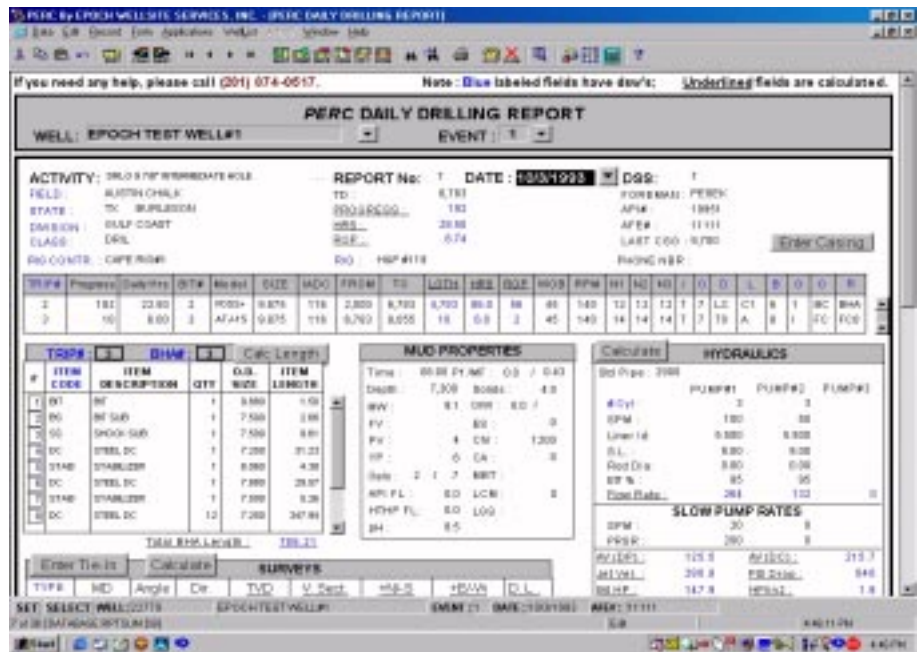

Access, storage and maintenance of your well data are administered with a few options. Well setup, storage locations, user rights and database optimization are available through on-line menu options. Our normalized database structure makes it simple to integrate other database applications and departments.

Versatility

Complete customization of the entire system is available to meet your specific needs. As your company grows, so can the software. PERC™ is the only software of its kind that can reflect your current corporate vision!

PERC™ MORNING REPORT SOFTWARE

"The Morning Report of Choice!"

Maximize your E&P Budget...
 Let PERC™ do the work!

Epoch offers a field proven, Windows-based daily reporting system called PERC™ (Petroleum Engineering Resource Coordinator). It tracks exactly what has happened on your well in the past 24 hours, providing a broad range of valuable information in a user friendly format. PERC™ is designed to increase your drilling efficiency, reduce your downtime and improve your economics. PERC™ allows you to incorporate the best procedures of the most successful rigs and to compare one drilling program to another to insure that you have the best performance possible. Epoch also offers unmatched technical support 24 hours a day, seven days a week to respond to problems or answer questions. More and more operators and drilling contractors are turning to Epoch for their daily reporting needs. By contacting one of Epoch's Sales Representatives, you too can make PERC™ work for you.
