

RIGWATCH Drilling Instrumentation
 DML Mudlogging Services
 PERC Morning Report Software
 RIGREPORT Morning Report Software

• Communications

Mudlog/Drilling Data can be transmitted "live" or on demand from the wellsite.

• Flexibility

LWD/MWD Data can be sent at the same time and plotted on the same log.

• Versatility

Over 45 available log formats to select from, including both TVD and MD presentations.

• Ease of Use

myWells.com users can now view their well data on a real-time basis.

• Portability

Logs can be plotted and redistributed as needed from your home or office.

• Presentation

Log quality is clear and colorful as opposed to a black and white fax.

• Data Management

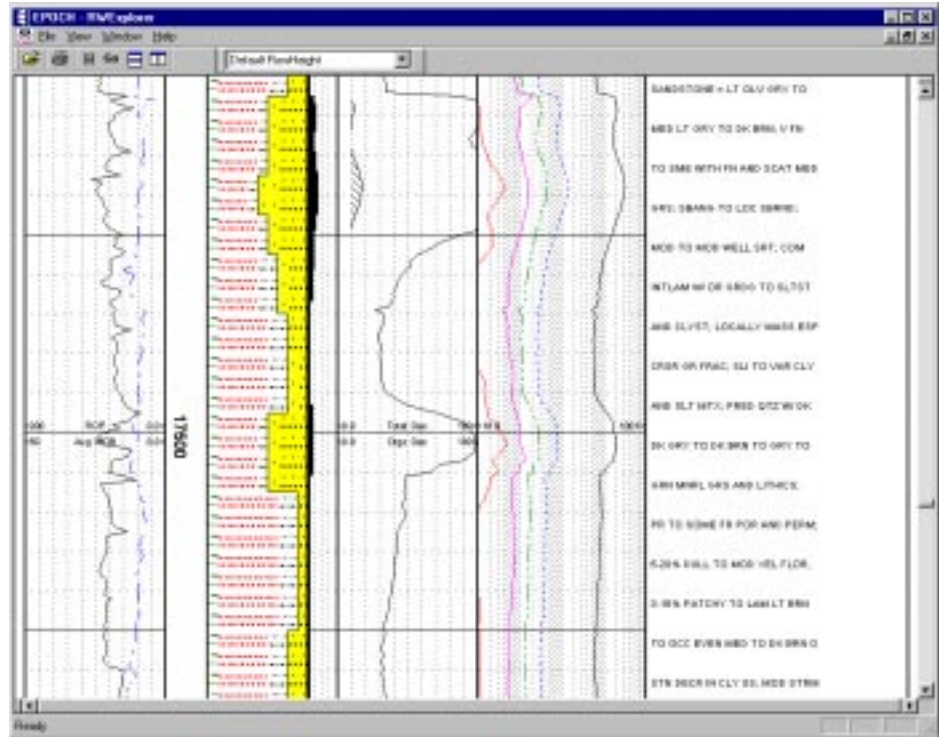

Data can be exported for further evaluation with other software.

• Offset Well Analysis

Offset wells can be displayed side by side and correlated to the live update of your current well.

RIGWATCH™ Explorer

"Bringing the Wellsite to the Office..."

Epoch Well Services, Inc. is dedicated to providing wellsite data in the most timely and useful manner. Rapid access to mudlogging and drilling information can be critical to making decisions that affect the success of the well. With this in mind, Epoch has introduced **RIGWATCH Explorer** as an optional service. **RIGWATCH Explorer** is a software package that allows geologists, engineers and drilling personnel to view and print logs at their home or office. The actual drilling data and the related mudlogging information is sent from the wellsite as required. This insures easy access to all wellsite data, as well as enhanced flexibility in creating a variety of presentations, analyzing the data, making correlations and exporting data.

RIGWATCH Explorer is available wherever Epoch Mudlogging Services or Drilling Instrumentation Systems are in use. Please contact an Epoch representative for additional information on this service.
